Food Is Still Scarce

There Are Now Many More People to Eat
America's Food Production. The War Is Not Over.

VICTORY GARDENS ARE VITAL

Once again our President is calling upon "We the People" to help in the important job of producing food; food so vital to Victory.

This means the Victory Garden program will receive national backing in every form.

The increased ration point values on processed foods, plus the tremendous publicity and support which will be given to the Victory Garden program means that the following points should be observed by everyone contemplating growing a Victory Garden:

1. Make a definite planting plan.
2. Grow only those vegetables your family likes.
3. Grow plants to provide a continuous harvest during the growing season.

Our Store and Greenhouses Are HEADQUARTERS

For the Best in
Vegetable Plants and
Vegetable Seeds for Your
VICTORY GARDEN

As the demand for seeds and plants will again be heavy, we suggest that your order your supply as early as possible.

PLEASE DO NOT ORDER FROM LAST YEAR'S CATALOG

ORNAMENTAL TREES

For Shade and Beauty

Trees serve to beautify the landscape by framing the picture and directing the eye to the house and points of interest. They also provide the very necessary background against which the house stands out. They should never be planted without well considered purpose. When carefully placed their play of shadow on the lawn, across walks and drives, is very delightful.

Birch—Cut Leaf, Weeping, 6 to 8 feet, \$2.50, \$3.00 and \$5.00.

Cherry—Japanese double pink flowering, 4 feet, \$1.00.

Crab—Double, large-flowering, pink, 4 feet, 75c.

Hawthorn—Very ornamental, double scarlet flowers, 6 feet, \$1.50 to \$3.00.

Locust—Rose pink flowering, 5 to 6 feet. \$2.00 each; 8 to 9 feet, \$3.00 each.

Locust—Black, fast growing, very desirable for this section, 8 to 10 feet, \$2.00.

Locust—Globe, round heads, need no pruning, very dense, 8 feet, \$2.50.

Mountain Ash—Clusters of red berries in fall. \$1.25 each.

Norway Maples, 6 to 8 feet, \$1.50 to \$2.50.

Maple—Soft, cut leaf, 8 to 10 feet, \$1.50 to \$2.00.

Prunus Triboli—Small trees covered with double rose-pink flowers. Very attractive. 4 feet. Each, \$1.50.

Willow—Upright. Giant catkins with pink cast. 75c to \$1.50 each.

Willow—Weeping Wisconsin, 6 to 8 feet, \$1.00 to \$1.50.

Evergreens

Most suitable for North Central Washington.

ARBOR VITAE—

Globular in shape—Dwarf, 1 to 2 feet. \$2.50 to \$5.00 each.

Pinus—Dwarf Mugho. \$2.00 to \$3.55.

SPRUCE—Colorado Blue: 3 to 4 feet, \$5.00; 5 to 6 feet, \$10.00 to \$20.00.

Norway—2 to 3 feet, \$3.00 to \$4.00.

PANSIES

Pansies have always been a great specialty with us and we are justly proud of the quality and trueness to type of our strains. Pansies succeed best in rich, well-drained soil in a sunny position, and produce their finest flowers in the cool, early days of spring. Keep flowers picked during the summer, plants pinched back, and you will get a nice lot of flowers again in the fall. For earliest blooms, seed indoors. Buy our hardy plants. 75c dozen.

THIS CATALOG FREE

We want everyone interested to have a copy of this book. Send in the names of any friends whom you would like to have receive a copy—and we'll gladly send them one—free.

FLOWERS IN WAR TIME?

By all means; make them your prophecy of peace.

Garden Success

Scientific placement tests indicate that the very best results are achieved when the plant food is placed in furrows 2 inches to each side of the seed row. The plant food furrow should be deep enough to allow the placing of the plant food 1 to 1½ inches below the planted seed or seed piece. VIGORO Victory Garden fertilizer should be applied at the rate of 1 quart (2 pounds) per 50 feet of row . . . that is, 1 pint (1 pound) on each side of the 50 feet of row. Under this method of row feeding, the seed is planted first and covered while the string row marker is in place. The plant food furrows are then made, the plant food distributed in them, and covered.

★

CULTIVATING

Most vegetables are fairly shallow-rooted. That means cultivating with hoe or cultivator must be shallow, too. If you keep after weeds, day by day, they will never be a problem that light, shallow soil stirring will not easily control.

★

WATERING

When you find the soil dry, water thoroughly. Really soak the ground, which means take off the nozzle and let the water run off a wide board or into trenches between rows. Light sprinklings do harm more often than they do good.

★

TYING

When you tie up tomatoes to stakes, remember to tie tightly to the stake and loosely to the plant. This applies to all tying up of fruits and vegetables.

★

SPRAYING

It is absolutely necessary to spray or dust vegetable gardens if you are to harvest first-quality produce. Whether you spray or dust, be certain that the underside of leaves is thoroughly covered, for the underside of leaves harbors most pests.

★

HARVESTING

Learn to harvest by experimenting and testing. Usually, vegetables have a finer flavor and texture before they reach maximum size. It's part of your reward as a gardener to enjoy these fine, tender young vegetables.

The vegetable garden is to be the way to a full table while the rationing of commercially processed and canned food is necessary. To millions of folk, vegetables fresh from the garden will be a real revelation of taste-thrilling quality. Flavor, tenderness, and other qualities you look for in vegetables are at their best when vegetables are canned or eaten immediately after being gathered.

IMPORTANT NOTICE ON PRICES

Owing to extraordinary conditions due to war, together with crop shortages and failures, prices in Milot-Mills List for 1945 must be subject to change without notice.

If your order cannot be filled at these prices, you will be notified, if you so request, of any advance which may have occurred, and given an opportunity to verify your order at the advanced rate.

EARLY ORDERS ARE URGENTLY ADVISED!

Milot-Mills Lawn Grass**Mixture**

Blue Grass and White Dutch Clover

Such as was used to make the Chelan County Court House lawn, the lawn at the ball park, the lawn at the golf course, the lawn at the hospital in Soap Lake, also the lawns around the many beautiful homes in Wenatchee and North Central Washington.

Sow one pound for a plot 10 by 20 feet square (200 sq. ft.).

For Your Information

While we aim to have in stock all varieties of vegetable seeds grown in this part of the country, there may be some which we do not stock because of small demand. These we can get for you on short notice from our regular sources of supplies. We strive to please our customers, and this is one of the many services we can render you.

There are also many plants which are grown in southern sections which will not prove practicable in this locality. If you have any questions about plants or vegetables of any kind we will be glad to advise you.

Add 3% Sales Tax to all items on this page.

BUSINESS TERMS AND HOW TO ORDER

All prices in this catalog are for cash f.o.b. Wenatchee. Mail orders sent C. O. D. when not accompanied by cash. Be sure to include 3% State Sales Tax, and transportation charges.

Unless otherwise requested, your order will be sent parcel post, unless too large, then by stage or express collect. The average postage on small orders amounts to 10c to 15c, larger orders, 20c to 50c. Orders sent out within twenty-four hours.

We reserve the right to ship orders at the proper season for planting, if ordered too early, unless shipment is demanded. Everything in the catalog cannot be shipped at once.

Any errors, or claims for refund, must be made within 24 hours of receipt of merchandise.

OUR GUARANTEE

While we exercise the greatest care to have all our stock run true to name, however, it is mutually understood and agreed to between the purchaser and ourselves that should any stock prove untrue, we shall in no case be liable for any sum greater than that originally received for such stock that may prove untrue, besides, we will not be responsible for the crop. All orders are booked only under the above conditions.

HORMODIN

ROOTS PRODUCED AT WILL

Hormodin stimulates rapid root growth on cuttings at low cost.

Hormodin Powder and Hormodin Liquid are root-inducing chemicals which stimulate

rapid root growth on cuttings. Many plants formerly impossible to propagate from cuttings may now be rooted with the aid of Hormodin.

HORMODIN POWDER

Since different plants require different treatment, Hormodin Powder has been developed in three strengths.

Powder No. 1. A general-purpose powder especially good for carnations, roses, chrysanthemums, and similar types. 50c

Powder No. 2. Designed for many of the woody and semi-woody types. 75c

Powder No. 3. Designed for the more resistant species including evergreens and dormant leafless cuttings. \$1.00

The treatment is simple. The moistened stems are dipped into Hormodin Powder then placed in the usual propagating medium.

HORMODIN "A" LIQUID

The liquid form of Hormodin is applied as a dilute, water solution. It offers the possibility of treating cuttings with any desired concentration at a cost of only a fraction of a cent per cutting.

Complete directions with plant name list, and a convenient measuring vial are included in each package.

5 cc.	\$1.00

A wonderfully effective spray for destroying Grubs, Maggots and Worms which infest Radishes, Turnips, Beets, Cauliflower, Cabbage, Onions, etc. Sure death to ants.

Half Pint, 50c; pint, 75c; quart, \$1.25

We have a good supply of

HOES, RAKES, CULTIVATORS and
WEEDERS

at Moderate Prices.

The use of proper garden tools will enable you to grow a better garden with less labor and add to the enjoyment of producing a much needed food supply.

How to Have a Good Lawn

Spade the ground as deep as possible and turn several times to see that it is thoroughly pulverized. Sheep guano or peat moss will add humus and improve the seed bed. Rake level and water thoroughly so the ground will settle. The seed bed should be allowed to stand for about two weeks, watering from time to time so the weed seeds will sprout.

Roll the ground before seeding, to prevent it from settling unevenly, and then rake the surface lightly. Sow the seeds so as to cover the ground thoroughly, and then cover it lightly with soil. Roll again so as to press the seed in firmly.

PETAMINE

A Complete Balanced Diet to be Fed Daily Throughout the Year.

What Petamine does for Canaries: Peps them up, increases song; adds color and sheen to feathers, and keeps them in fine, vigorous condition.

Restores lost song and feathers and cures many ailments when due to faulty diets. Makes moulting easier and faster and plumage more brilliant and colorful.

Works wonders during breeding season, produces more fertile eggs, finer, sturdier young birds.

Petamine may be used as the exclusive diet or with mixed whole seeds. Recommended for all cage birds. 25c. Net weight, five ounces. Also 65c lb.; 2 lbs., \$1.20.

SPECIAL—Milot-Mills Birdseed Mixture— 1 lb., 20c; 2 lbs., 38c. Postage extra.

Hints on Care of Goldfish

Should the fish show signs of having fungus, or become logy, a salt bath will bring them out of it; or should the fish come to the top for air it shows there are too many fish in the bowl or aquarium.

Write us for pamphlet on Care and Feeding of Fish and Baby Turtles.

FLOWER SEEDS---All-American Award Winners for 1944

Including new and rare kinds and varieties which received the highest awards for the year 1944. Our stock includes special and original assortments of Bodger's, Burpee's, Vaughn's, Dreer's, and Ferry-Morse flower seeds. We also put up in our own packets many varieties which we secure direct from the originators and growers in California. Should there be some special variety not in stock we will gladly order for you and save you the trouble and cost of money order.
